## Amara Raja Energy & Mobility

*BESS announcement augurs well despite soft show; upgrade to BUY*

Amara Raja Energy & Mobility reported standalone EBITDA of Rs4.13bn (down 10% y/y) vs. lower than our estimate of Rs3.94bn due to lower-than-expected revenues and gross margin. As the outlook for automotive and industrial demand is bright in lead acid batteries, the company is expected to gain share, going forward. Further, margin is expected to expand with new tubular battery and recycling plant. It also plans to set up a lithium-ion cell manufacturing plant, which is expected to commence operations from end-FY27. Further, one 5GWh BESS solutions plant has been approved with a revenue potential up to Rs28bn by FY30e. We introduce estimate for FY28e with 8/12/14% revenue/EBITDA/PAT growth. We turn positive with the BESS announcement. At CMP, the stock is reasonably valued at 15/13x on FY27/28e. We upgrade our rating on the stock to BUY with a TP of Rs1,050 (from Rs1,125 earlier), valuing it at 12x FY28e parent EPS (vs. 12x FY27e EPS previously), ARACT NPV (new lithium energy unit) at Rs210/share and BESS at Rs73/share.

**Lower-than-Estimated Performance from Key Metrics:** Standalone revenue grew 6% y/y to Rs33.51bn (below our estimate of Rs34.39bn). Further, EBITDA fell 10% to Rs3.75bn (lower than our estimate of Rs4.13bn) due to lower-than-expected revenue and gross margin (down 140bps y/y to 31.8%). Notably, the tax rate was lower at 22.2% in Q3FY26 vs. 35.5% in Q3FY25. Accordingly, APAT fell 3% y/y to Rs1.95bn (lower than our estimate of Rs2.06bn, mainly due to lower operating profit).

**Outlook and Valuation:** We expect parent's revenue/EBITDA to clock 9/18% CAGR over FY26-28e. Further, on account of higher input/opex cost and lower revenue/other income, we lower our EPS estimate by 19-29% for FY26/27e. We upgrade our rating on the stock to BUY with a revised TP of Rs1,050 (from Rs1,125 earlier), valuing it at 12x FY28e parent EPS (vs. 12x FY27e EPS previously), valuing (a) the parent at 12x FY28e EPS (vs. 12x FY27e EPS previously); (b) ARACT NPV (new lithium energy unit) at Rs210/share; and (c) BESS at Rs73/share. We see ARACT's revenue/PAT at Rs43.2/2.16bn by FY31 and assign 25x multiple on discounted PAT. We see BESS's revenue/PAT at Rs22.4bn/672m by FY30 and assign 25x valuation multiple on discounted PAT. **Key Risks:** (a) Weaker growth in lead batteries; (b) lower orders for lithium-ion cell/BESS plant; and (c) adverse commodity prices.

## Earnings Concall – Key Highlights

### Lead Acid Biz

- **Quarterly Volume:** Domestic 4W volume rose 7% y/y (OEM: 25% and Aftermarket: 3%). 2W volume rose by 1% y/y, due to a high base (15-17% growth in Q3FY25) and a platform-specific OEM temporary shutdown. Other segments (tubular and home UPS) grew 10%, aided by higher in-house tubular production. Industrial volume (ex-telecom) rose 2% and UPS increased 5%, while telecom fell 45% (<5% of revenue). Export down 15% y/y due to tariff-related and competitive pressure (Middle East and APAC markets). Telecom segment market share stood at ~55%, combined across lead-acid and lithium battery offerings.
- **Quarterly Margin:** Sequential contraction in gross margin is attributed to higher RM cost (tin/antimony alloys, sulphuric acid and lead) and OEM-mix. EBITDA margin contracted q/q due to lower gross margin and higher warranty/EPR provisioning, partly offset by ~60bps uplift from recycling plant. The management expects a normal tubular season could support margin in Q4 FY26, while it targets ~13-14% EBITDA margin in the medium-term, subject to cost normalisation and mix recovery.
- **Price Hike:** The company hiked the prices by ~2% in Jan-26 to mitigate the commodity inflation. RM cost pass-through to OEMs is limited to lead, while cost increases for other RMs are not pass through.
- **Capacity:** Recycling plant refining is operational and battery breaking to start by Q1 FY27.
- **Capex:** FY26 guided at ~Rs7-8bn (including tubular plant reinstatement, partly insurance-funded), normalising to ~Rs3-4bn in FY27e.

### Lithium Battery Biz

- **Quarterly Snippets:** Revenue more than doubled to Rs2.36bn. It supplied ~250MWh of telecom packs, driving ~80% stationary capacity utilisation. Total telecom demand opportunity is currently <3GWh.
- **BESS Solutions Plant:** Capex of ~Rs2.8bn is approved for 5GWh BESS solutions plant, which is expected to be operational by Q4 FY27. It expects 25-30GWh market opportunity by FY31e across grid and C&I segment from <1GWh currently. Initially, BESS will use 314Ah LFP cells with imported content and gradual localisation. **Revenue potential of plant is seen at Rs27-28bn** (9-10x asset turns due to solution architecture – battery packs, and inverter DC blocks etc.) with gradual ramp-up, as requirement builds (but tenders are evolving quickly). It expects 15% market share with 5GWh capacity. Whilst operating margin is expected to be low, RoCE should be good due to higher asset turns.
- **Investment and Capex:** The company infused ~Rs2bn into ARACT in Q3 FY26, taking total investment to ~Rs14bn. It incurred ~Rs3bn capex YTD.

## Outlook and Valuation

### Lithium Cell Batteries

- AMRJ plans to set up a lithium-ion cell manufacturing plant, which is to be gradually commissioned from FY27e.
- It has developed NMC technology with Highstar, while LFP technologies are being developed with Gotion Inobat.
- E positive labs, customer qualification (60MWh/year) and NMC cell (2GWh) plants are being constructed at Rs20bn capex and would be ready by H2 FY27.
- The LFP cell plant could be of 4-5 GWh with two cell types and would be ready by CY27/28e with Rs20-25bn capex. Average realisation is expected at \$80-90/kWh.
- Larger customer wins and sustainable profitability are the key monitorable ahead.

### Battery Packs, Chargers

- Battery packs are supplied to 3W OEMs (Piaggio, M&M) and telecoms (BSNL, Indus Towers, Airtel, Vi). Chargers are supplied to 3W OEMs (M&M, Piaggio).
- The company is preparing for 2W and certain high-voltage applications, having entered a technology agreement. Battery pack capacity at 2.5GW/h (including 1 GWh for telecoms).
- Q3 revenue has already jumped to Rs2.36bn and supplied ~250 MWh of telecom packs, driving ~80% of stationary capacity utilization.

### Lead Batteries

- The outlook for automotive and industrial demand is bright. Volume growth would be in high-single digits.
- We expect a 9% revenue CAGR over FY26-28. Margins would improve, led by better nett pricing and new tubular/recycling plant.

**Valuation:** We expect parent's revenue/EBITDA to clock 9/18% CAGR over FY26-28e. We recommend BUY with a revised TP of Rs1,050, valuing it at 12x FY28e parent EPS, valuing (a) parent at 12x FY28e EPS; (b) ARACT NPV (new lithium energy unit) at Rs210/share; and (c) BESS at Rs73/share. We see ARACT's revenue/PAT at Rs43.2/2.16bn by FY31 and assign 25x multiple on discounted PAT. We see BESS's revenue/PAT at Rs22.4bn/672m by FY30 and assign 25x valuation multiple on discounted PAT.

**Fig 10 – 1-Year Forward P/E (Median 20x) – Attractive Valuation - Below Median**

Source: Company, Anand Rath Research

**Key Risks**

- Weaker growth in lead batteries.
- Lower orders for lithium-ion cell/BESS plant.
- Adverse commodity prices.
