#### Mundra SPPA and RE execution key drivers in FY27

- **Weak 3Q amid Mundra shutdown:** Tata Power (TPWR) reported a 3QFY26 APAT of INR7.7b, indicating a 20% miss vs. our est. The weaker-than-expected performance was primarily attributable to the standalone business, which reported a PAT loss of INR1.6b during the quarter due to the Mundra plant remaining shut. In contrast, profitability at TPDDL improved sharply, supported by the receipt of INR3.4b towards past-period tariff recoveries. Reported EBITDA was INR30.5b, which was 4% below our est.
- **Key things we liked about the result:** 1) the Odisha distribution business continues to report a stellar improvement in profitability on a YoY basis driven by lower ECL charges and improved cash collections; 2) management guided that the company is close to finalizing the Mundra SPPA with the Gujarat government, and the plant could potentially restart by the end of FY26; 3) cell and module assets continue to operate at industry-leading scale with a yield of ~95%; and 4) rooftop earnings momentum remains strong, with 9MFY26 EBITDA up 2.7x YoY.
- **Key monitorables:** Finalization of the Mundra SPPA and restart of the plant by the end of FY26. While its own RE commissioning was weak at 559MW in 9MFY26 (FY26 target: 1.1GW), this should pick up in FY27 as third-party installation will significantly decline.
- **Key changes to our earnings estimates:** We cut our FY26E/FY27E PAT by 4%/3% to account for the potential closure of the Mundra plant in 4QFY26 and a slower-than-expected pace of its own RE commissioning. We cut our EV/EBITDA multiple for the renewable business to 12x (vs. 14x earlier).
- **Valuation and view:** The valuation of TPWR is segmented across various business units. The regulated business is valued using a 2.5x multiple on regulated equity; the coal segment is valued at 1x book value; the renewables segment is valued at 12x FY28E EBITDA; the pumped storage segment and other segments are valued at 1x PB; and for cash and investments, we add INR37/share. The sum of these contributions results in a TP of INR455/share.

#### Result below our estimates; Mundra shutdown affects performance

##### Financial Performance

- TPWR reported revenue at INR139.5b (-9% YoY, -10% QoQ), missing our estimates by 23%. The miss was attributed mainly to the continued shutdown of the Mundra plant.
- TPWR posted an EBITDA of INR30.5b (-9% YoY, -7% QoQ), which missed our estimates by 4.3%. The EBITDA margin was 21.9% vs. the projected 17.6%.
- APAT was INR7.7b (-25% YoY, 16% QoQ), missing our estimates by 19.7%.

### Operational Performance

- TPWR commissioned 919MW RE capacity, including 357MW own projects and 562MW of third-party EPC.
- It installed ~0.57m smart meters and added 372MWp rooftop capacity in 3Q.
- The company's total portfolio now stands at 26.3GW, with 16.3GW operational and 10.0GW under construction.
- TPWR's module manufacturing arm produced 990MW and 962MW of solar modules and cells, respectively.
- TPWR has an order book of INR11.7b for their rooftop EPC and a utility scale order book of INR9.2b.

### Highlights of the 3QFY26 performance

- During 3QFY26, new businesses scaled up well, with the Cell & Module manufacturing segment reporting a sharp improvement in profitability and rooftop solar execution rising to 372MW vs. 173MW in 3QFY25; rooftop solar PAT increased to INR1.1b from INR0.6b YoY.
- The Odisha discom business delivered a strong turnaround, with PAT increasing to INR2.26b from INR0.8b last year.
- Delhi distribution performance improved, with higher EBITDA aided by a one-off FY23 tariff true-up, contributing ~INR3.44b to PAT in 3QFY26.
- Losses from the Mundra plant shutdown, estimated at ~INR8b over nine months due to foregone capacity charges, were partly offset by stronger performance in Delhi distribution and rooftop solar; a similar regulatory impact was seen in the same quarter last year.
- The Mundra power plant did not operate in 3QFY26; however, SPPA discussions with the Gujarat government are nearing completion, and the plant is expected to restart ahead of summer demand, with similar arrangements planned with other states.
- The renewable energy pipeline stands at 5.2GW, with 2.5-3.0GW targeted for commissioning next year (around 50% solar); an additional 400–500 MW is nearing completion this quarter (9MFY26: 559 MW), and third-party EPC activity is largely tapering off.
- In solar manufacturing, module sales totaled 960 MW (including 168 MW under ALMM), with increasing use of in-house cells.

### Valuations

- The valuation of TPWR is segmented across various business units, leading to a TP of INR455/share.
- Regulated business is valued using a 2.5x multiple on regulated equity.
- The coal segment is valued at 1x book value.
- The renewables segment is valued at 12x FY28E EBITDA.
- The pumped storage segment and other segments are valued at 1x PB. For cash and investments, we add INR37/share.
- The sum of these contributions results in a TP of INR455/share, reflecting the comprehensive valuation of TPWR's diverse business segments.

## Highlights from the management commentary

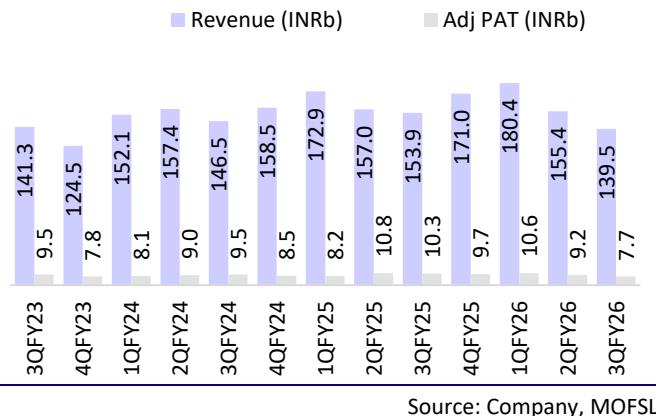

- India's peak power demand is expected to reach around 270 GW during the summer months. Over the last nine months, the country has seen strong renewable energy capacity additions, with 45 GW installed, of which 38 GW was renewable energy, and this growth momentum is expected to continue.
- The company has delivered a solid financial performance despite challenges. EBITDA for the first nine months rose 12% year-on-year, while PAT increased 7% year-on-year. Profit after tax stood at INR11.9b, even though the Mundra plant remained non-operational during the period.
- During Q3 FY26, new businesses scaled up well. The C&M manufacturing segment reported a sharp rise in profitability, and the rooftop solar business showed strong growth, executing 372 MW compared to 173 MW in the same quarter last year. Rooftop solar PAT increased to INR1.1b from INR0.6b last year.
- The Odisha discom business showed a significant turnaround, with Q3 PAT rising to INR2.26b from INR0.8b last year. This improvement was supported by operational gains, lower expected credit losses, and cash recovery of nearly INR8b.
- In the Delhi distribution business, EBITDA improved, and performance was supported by a one-off gain related to a FY23 tariff true-up. In 3QFY26, this contributed about INR3.44b at the PAT level.
- Losses from the Mundra plant shutdown — estimated at around INR8b over nine months due to foregone capacity charges — were partly offset by stronger performance in Delhi distribution and rooftop solar. A similar regulatory impact had also occurred in the same quarter last year.
- The Mundra power plant did not operate in 3QFY26. However, discussions on a Supplementary Power Purchase Agreement (SPPA) with the Gujarat government are nearly complete, and the plant is expected to restart soon in time for summer demand. The company also plans to offer similar arrangements to other states, which could enable a broader revival of the plant.
- In the transmission segment, the company completed some TBCB (tariff-based competitive bidding) projects and expects to complete more shortly.
- The company has a renewable energy pipeline of 5.2 GW, with project commissioning being aligned with transmission readiness. It expects to commission 2.5–3 GW next year, about half of which will be solar. An additional 400–500 MW of projects are close to completion this quarter (9MFY26: 559 MW), and third-party EPC projects are largely winding down.
- In the solar manufacturing business, the company sold 960 MW of modules, including 168 MW under ALMM, and plans to increasingly use its own solar cells. Decisions on wafer and ingot technology are still under evaluation, and although Chinese wafer prices have increased, the impact on project returns has so far been modest.
- The distribution sector could see structural changes going forward, with more opportunities arising from parallel licenses and potential public-private partnerships, especially in financially stressed states. Greater policy clarity on nuclear power is also expected in the coming months.
