## Earnings beat estimates; maintain BUY

NMDC's 1QFY22 adjusted EBITDA of Rs 41.8bn (347% YoY, -6.5% QoQ) was 12% above our estimates. Net sales stood at Rs 65.1bn (+236% YoY, -4.9% QoQ). Iron ore production for the quarter was 8.9mt (+5% YoY, -28% QoQ) with sales of 9.4mt (+47% YoY, -15% QoQ), largely in-line with estimates. Average sales realisation stood at Rs 6,892/t (+88% YoY, +12% QoQ). The cost of production - CoP (excluding selling expenses, royalty) was USD 3.9/t (-60% YoY, -48% QoQ). We maintain our FY22E/23E EBITDA at 149bn/126bn based on a) a sharp increase in iron ore prices, b) higher volumes from the existing Chhattisgarh iron ore mines and the restart of the 7mt Donimalai, Karnataka iron ore mines. Our assumptions for FY22E/23E remain unchanged. For iron ore, we retain our FY22E/23E price assumptions at USD 94/88/t. We also maintain our volume assumptions for FY22E/23E at 41mt/42mt. We continue to value NMDC's core iron ore business at 4x EV/EBITDA (in line with global peers). We value the upcoming 3mt Nagarnar steel plant at 1x price/book value and arrive at a price of Rs 58/share for the steel entity. We view the demerger of the steel business as positive for NMDC as it will lead to a higher focus on the core iron ore business and improve the overall valuations. We retain our BUY rating and target price of Rs 248.

## Key highlights from 1QFY22 results:

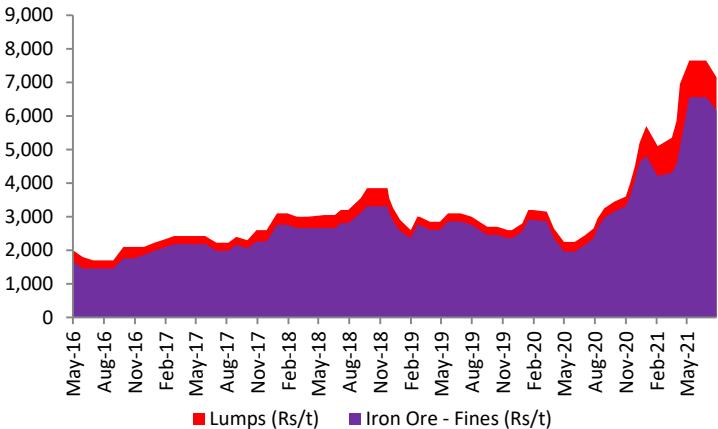

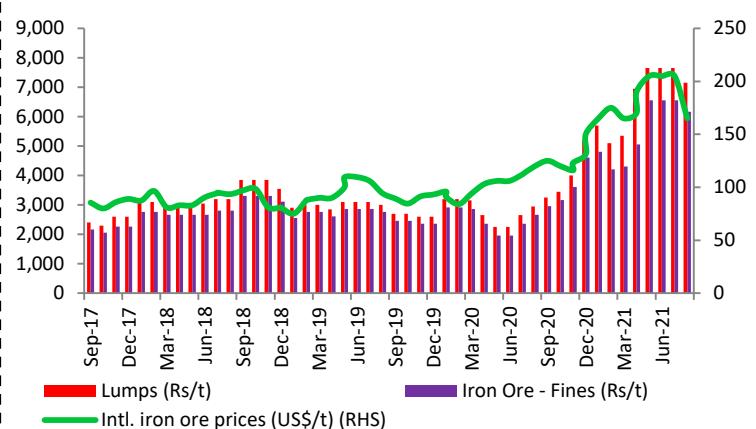

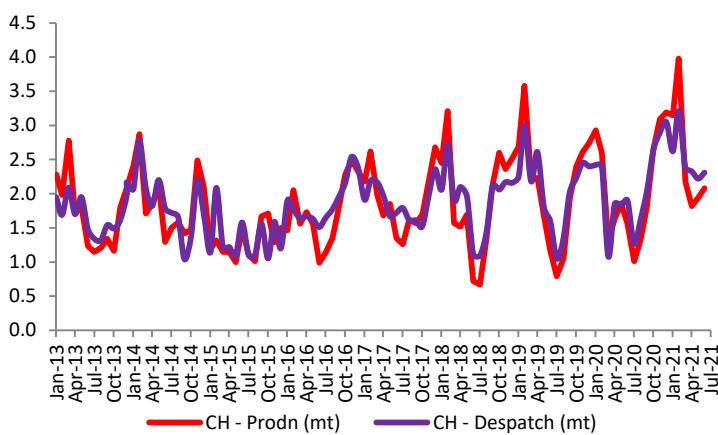

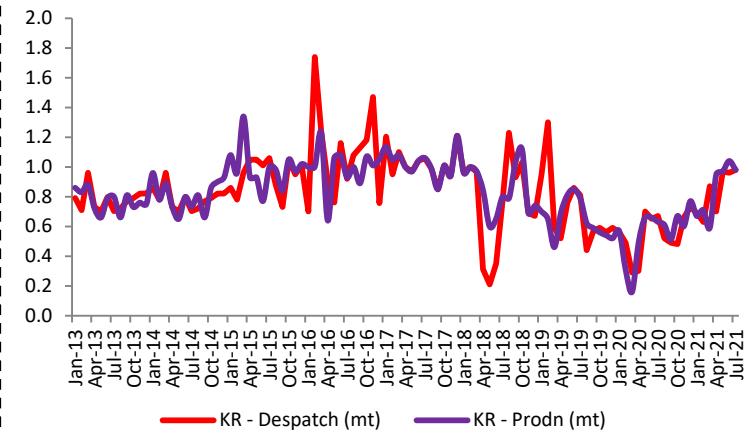

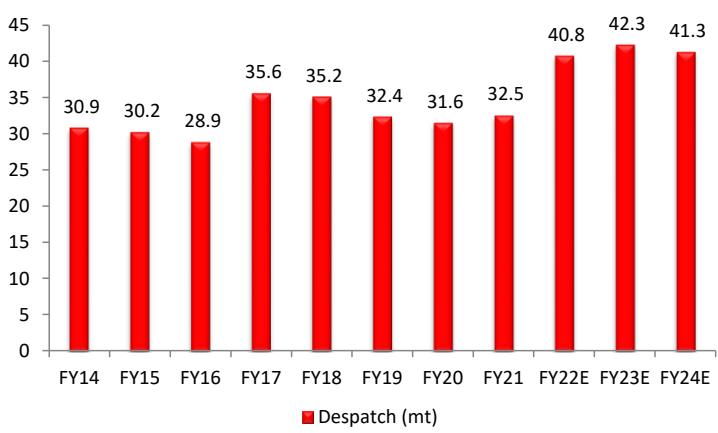

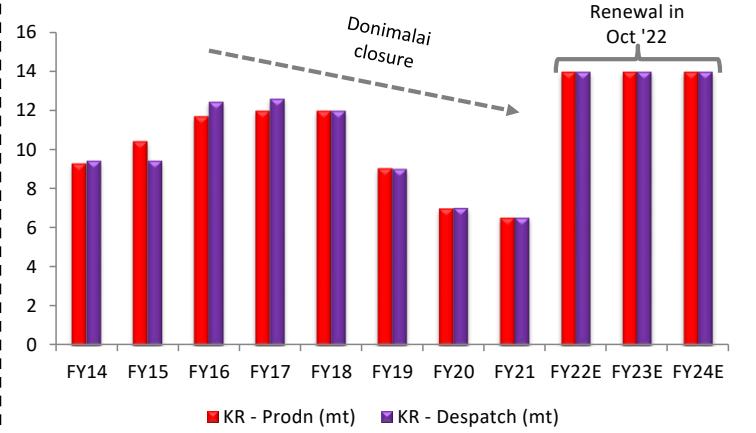

- NMDC has completely stepped away from export markets with the removal of preferential export duty from 10% to 30%. Its exports during 1QFY22 were NIL compared to 0.3mt YoY and 0.8mt QoQ. We expect this trend to persist in the coming quarters.
- The price cut of Rs 500/t announced on 8<sup>th</sup> August was significantly below expectations, indicating NMDC's temporary pricing power. Currently, its prices are at a 50% discount to international benchmark Chinese landed prices compared to an average discount of 60% over the last 3 years. Post the Odisha merchant mines auction in March 2020, the merchant iron ore market has fewer players with better pricing power.
- 1QFY22 was the first full quarter of levy of an additional premium of 150% of royalty; it is currently applicable on 85% of its output. During the quarter, NMDC raised prices by Rs 723/t, which only partially offset the levy of premium of about Rs 1,210/t.
- NMDC's pellet operations turned around during the quarter. Further, it reported an unusually high inventory adjustment of Rs 5.4bn, accounting for most of the earnings beat.

**Prices likely to stabilize after recent correction:** Iron ore prices have fallen sharply over the last few weeks from a high of USD 220/t to USD 160/t largely due to news reports of the Chinese government taking measures to curb steel output. Steel production growth in China slowed down to 1.5% YoY in June 2021 but continued to remain high at 11.8% on YTD basis, implying significant cuts ahead if Chinese government maintains its stance on curbing production.

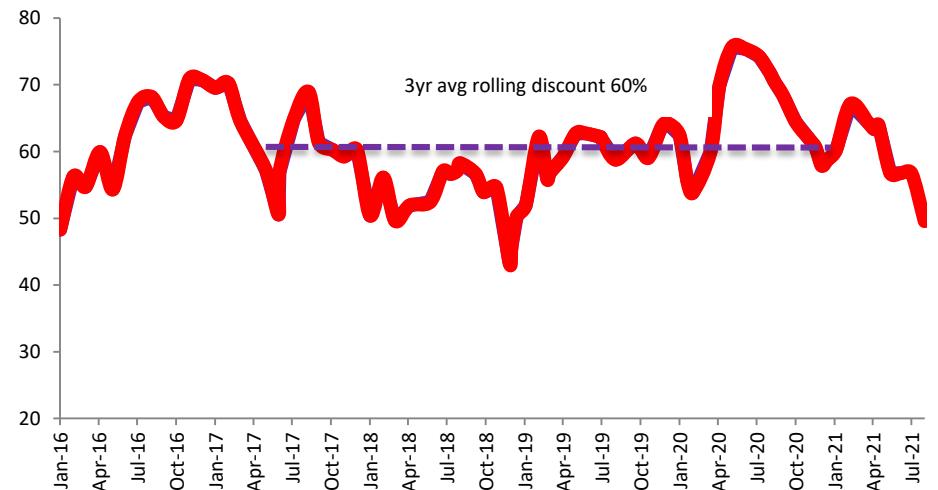

Our iron ore pricing assumptions remain unchanged at Rs 7,058/t and Rs 6,615/t for FY22E and FY23E, respectively. However, a meaningful correction from the current levels would lead to a cut in our estimates.

**Maintain BUY:** We maintain our target price of Rs 248/share based on 4x EV/EBITDA for its core iron ore mining business and 1x price/book for its upcoming Nagarnar Chhattisgarh steel plant.

Value discovery at NMDC has taken significantly longer than expected due to several factors including a) incessant increase in taxes - the government of India has increased the levy of taxation manifold. Royalties (including premium) have surged from 8-10% of sales in FY11 to 30-35% of sales in FY22 and b) poor capital allocation and project execution. NMDC has spent about Rs 180bn towards setting up a steel plant for which it has no experience; the plant has seen commissioning delays of more than a few years.
