## About the product

As the tagline suggests, **BULLS & BEARS** is a handbook on valuations in India. Every month, it will cover:

- Valuations of Indian market vis-à-vis global markets
- Current valuation of companies in various sectors
- Sectors that are currently valued at a premium/discount to their historical long-period averages

### NOTES:

- Prices as on 31 Aug'21
- **BULL icon:**   
Sectors trading at a premium to their historical average
- **BEAR icon:**   
Sectors trading at a discount to their historical average
- Valuations are on a 12-month forward basis unless otherwise mentioned
- Sector valuations are based on MOSL coverage companies
- Global equities data sourced from Bloomberg; Nifty valuations based on MOFSL estimates

Investors are advised to refer to important disclosures made at the end of this report.

# Strategy: Nifty closes at record high in Aug'21; India outperforms global markets

- **Nifty closes above 17k; adds 1k points in 19 trading days:** The Nifty exceeded the 17,000 mark in Aug'21 to reach a record high, after remaining muted over the last two months. It ended 8.7% higher MoM in Aug'21 to close at 17,132. The rally was driven by positive Asian cues, strong inflows by FIIs/DIIs, and a good end to the 1QFY22 corporate earnings season. FII inflows returned to USD1b in Aug'21, after recording the highest outflows in July'21 since Mar'20 (-USD1.7b). DIIs saw inflows for six consecutive months to USD0.9b. The Nifty Midcap 100 (+2.2%, MoM) and Nifty Smallcap 100 (-2.5%, MoM) underperformed the markets in Aug'21. In the last 12 months, midcaps have risen 70% v/s a 50% rise for the Nifty. In P/E terms, the Nifty Midcap 100 is now trading at a 9% discount to the Nifty.
- **Macro rebounds – best ever real GDP growth of 20.1% YoY in 1QFY22:** Real GDP/GVA grew 20.1%/18.8% YoY in 1QFY22 (v/s our forecast and the Bloomberg consensus of 21%/19.6%). Growth in real GDP was largely attributable to 13.8% YoY growth in consumption and 56.7% YoY growth in Gross Capital Formation (GCF). Nominal GDP grew 31.7% YoY in 1QFY22, against a contraction of 22.3% YoY in 1QFY21.
- **1QFY22 Results Review - Strong start to FY22:** Corporate earnings in the first quarter of FY22 have been in line with the elevated expectations, aided by the deflated base of 1QFY21 and localized and less stringent lockdowns v/s 1QFY21. Nifty sales have been in-line (50% YoY; est. 48%), while EBITDA/PBT/PAT growth has come in at 41%/103%/101% YoY (est. 38%/89%/94%). The MOFSL Universe has reported sales/EBITDA/PBT/PAT growth of 51%/50%/120%/117% YoY (est. 46%/46%/111%/114%).
- **India the best performing market in Aug'21:** Barring Brazil (-2% MoM) and Korea (-0%), Aug'21 saw all the key global markets – such as India (+9%), China (+4%), Japan (+3%), the US (+3%), Russia (+3%), MSCI EM (+2%), Taiwan (+1%), Indonesia (+1%), and the UK (+1%) – end higher in local currency terms. In the last 12 months, MSCI India (+51%) has outperformed the MSCI EM (+19%). In the last 10 years, MSCI India has outperformed the MSCI EM by 181%. In P/E terms, MSCI India is trading at an 80% premium to MSCI EM, above its historical average of 57%.
- **Technology, Utilities, Telecom, Finance, and Consumer outperform market:** Among the sectors, Technology (+13%), Utilities (+12%), Telecom (+11%), Finance (+10%), and Consumer (+10%) were the outperformers in Aug'21. Media (-11%), PSU Banks (-4%), Real Estate (-3%), Metals (-1%), Healthcare (-1%), and Autos (-0%) were the only laggards. Bajaj Finance (+21%), Bajaj Finserv (+20%), Tech Mahindra (+20%), TCS (+20%), and Bharti Airtel (+18%) were the top performers. UPL (-8%), JSW Steel (-7%), Grasim Inds (-3%), Bajaj Auto (-3%), and Tata Motors (-2%) were the top laggards. In this edition, we dive deep into the valuation metrics of the Banking sector.
- **Polarized markets; valuation divergence to continue:** Markets are scaling new highs led by strong earnings delivery, benign liquidity and buoyant sentiments. Good 1QFY22 earnings delivery has boosted hopes for a solid FY22 with 30%+ projected Nifty earnings growth, on the back of a strong 15% earnings growth in FY21. Mid-Caps and Small-caps have been outperforming in CY21 amidst a very busy primary market activity. 1QFY22 Management commentaries across the board suggest an improved demand environment post June'21, led by the easing of restrictions, lower active COVID-19 cases, and a pickup in vaccinations. Amid the buoyant sentiment and elevated activity in the primary markets, Nifty valuations at 21.8x 12m forward EPS remain rich. Thus, consistent delivery on earnings expectations becomes crucial going ahead. We remain OW on BFSI, IT, Metals, Cement, and Capital Goods; Neutral on Consumer, Auto, and Healthcare; and UW on Telecom, Energy, and Utilities.
- **Top ideas: Largecaps:** ICICI Bank, SBI, Infosys, HCL Technologies, UltraTech, HUVR, Titan, Divi's Labs, Hindalco, and SBI Cards. **Midcaps:** Max Financials, Chola Finance, JK Cements, Indian Hotels, Deepak Nitrite, Orient Electric, Solara, Zensar Tech, L&T Technology, and ABFRL.

# Valuation deep-dive for the month: Banking

- As a consequence of the second wave of COVID-19, most banks reported sluggish disbursements, resulting in muted trends in overall loan growth. However, banks reported an uptick in disbursements over Jul'21. We estimate business growth to pick up, supported by the upcoming festive season, and accelerate further in ensuing quarters. Overall, we expect systemic loans to grow at 8%/12% over FY22E/FY23E.
- Asset quality deteriorated sequentially as banks reported higher slippage, weighed by Retail and SME. The overall impact was, however, curtailed and much lower v/s the first COVID wave. PCR remains healthy, with banks continuing to carry additional provision buffers. The restructuring book, despite increasing, remains controlled.
- Collection efficiency improved steadily over Jun–Jul'21 and would enable moderation in the slippage run-rate from 2HFY22. Banks carry additional provision buffers, which should limit the impact on credit cost. We expect banks to continue to strengthen their balance sheets – as they have already shored up their capital ratios – and estimate credit cost to normalize from FY22.
- Historically, **private banks** (10-year average P/B multiple of 2.5x) have always traded at a premium to **PSBs** (0.9x) owing to their (i) superior earnings profiles, (ii) return ratios, and (iii) consistent market share gains. Private banks currently trade at 2.9x one-year forward P/B. We believe a pick-up in loan growth, along with moderation in slippage / credit cost, would drive earnings, resulting in the further re-rating of the stocks.
- The P/B multiple for PSBs at 1x is moderately above its 10-year average of 0.9x. We believe earnings for PSU banks are poised for a strong rebound. Along with improving asset quality trends, this would enable a healthy 9–21% CAGR in ABVs over FY21–23E v/s muted growth/decline in the past. We estimate PSU banks to deliver early double-digit RoE by FY23, while valuations remain undemanding at 0.4–0.6x ABV (barring for SBIN). Thus, we upgrade our rating on BOB to BUY and resumed coverage on INBK and UNBK with a Buy rating. **SBI remains our top pick in the sector.**
- Overall, large banks appear to be well-placed to accelerate market share gains given their strong capital positions, robust balance sheets, and higher provisioning coverage. We prefer ICICIBC, SBIN, and AXSB among the large banks and FB in the midcap space.

## Trend in Private Banks P/B – one-year forward

## Premium/discount of Private Banks relative to Nifty P/B

## Trend in PSU Banks P/B – one-year forward

# Indian equities: Nifty closes above 17k; adds 1k points in 19 trading days

- The Nifty exceeded the 17,000 mark in Aug'21 to reach record highs, after remaining muted in the last two months. It ended 8.7% higher MoM in Aug'21 to close at 17,132. The rally was fueled by positive Asian cues, strong inflows by FIIs and DIIs, and a good end to the 1QFY22 corporate earnings season.
- Among the sectors, Technology (+13%), Utilities (+12%), Telecom (+11%), Finance (+10%), and Consumer (+10%) were the outperformers in Aug'21.
- Media (-11%), PSU Banks (-4%), Real Estate (-3%), Metals (-1%), Healthcare (-1%), and Autos (-0%) were the only laggards.

**Nifty MoM change (%) — rebound after muted performance in previous month**

**Institutional flows (USD b) — DIIs inflows remain strong; FIIs see inflows in Aug after outflows in July**

**Sectoral MoM change (%) — Technology, Utilities, Telecom, Finance, and Consumer outperform market**

# Indian equities: Breadth positive in Aug'21; 40 Nifty constituents end higher

- **Best and worst Nifty performers in Aug'21:** Bajaj Finance (+21%), Bajaj Finserv (+20%), Tech Mahindra (+20%), TCS (+20%), and Bharti Airtel (+18%) were the top performers. UPL (-8%), JSW Steel (-7%), Grasim Inds (-3%), Bajaj Auto (-3%), and Tata Motors (-2%) were the top laggards.
- **Best and worst Nifty performers in CY21 YTD:** Tata Steel (+125%), Hindalco (+95%), Bajaj Finserv (+92%), JSW Steel (+78%), and Wipro (+66%) are the top performers. Kotak Mahindra Bank (-12%), Hero MotoCorp (-12%), Maruti Suzuki (-11%), and Dr Reddy's (-10%) are the only laggards.

## Best and worst Nifty performers (MoM) in Aug'21 (%) – breadth positive; 40 Nifty constituents trade higher

## Best and worst Nifty performers (YoY) in CY21 YTD (%) – 46 constituents trade higher

# Indian equities: Midcaps outperform largecaps in last 12 months

- In the last 12 months, midcaps have risen by 70% v/s a 50% rise for the Nifty. In the last five years, midcaps have underperformed by 10%.
- In P/E terms, the Nifty Midcap 100 is trading at a 9% discount to the Nifty.

## Midcaps outperform largecaps in last 12 months

# Sector valuations: Two-thirds of sectors trading at premium to their averages

- The Technology sector is trading at P/E of 30.0x, a 71% premium to its historical average of 17.5x. 1QFY22 witnessed strong sequential growth across companies, with the midcaps outgrowing the largecaps. The overall outlook on enterprise technology spending is strong, and the outlook for Indian IT growth is robust. The industry is facing supply-side challenges, which are visible in the higher attrition and wage inflation.
- NBFCs trade at P/B of 3.5x, above the historical average of 2.6x (a 32% premium). Some of the larger HFCs are optimistic about reducing credit costs in the coming years, driven by provision reversals/write-backs on customer accounts, wherein they have conservatively made provisions. For AMCs, equity inflows have been strong in the past few months and are likely to sustain. With strong market returns, AUM growth is expected to remain strong.
- The Consumer sector P/E of 47.2x in Aug'21 is at a premium of ~27% to its 10-year average of 37x. On a P/B basis, it trades at 11.2x, at a premium of ~13%, with the 10-year average at 9.9x. As the country moves beyond the second wave, the focus has been on the unlocking of the economy. This has resulted in fast recovery in consumer mobility and sentiment. This has set the path to recovery in the Discretionary and Out-of-Home categories. Staples continues to do well. Companies with a higher skew towards Discretionary would stand to benefit.

# Autos: Supply chain constraints restrict PV wholesales; Tractor declines on high base

- The Auto sector is trading at P/E of 21.5x, near its historical average of 21.6x.
- PV/MHCV/LCV volumes grew 8%/119%/35 YoY, while 2W/Tractor declined 10%/15% YoY. The performance of PV was restricted by the semiconductor shortage, while CV recovered with an increase in economic activity. Tractor declined on a high base; weak 2W volumes indicate slower recovery. Export 2W sales fared better owing to strong demand.
- Valuations on a P/B basis stand at 3.1x, near the 10-year average of 3x.
- We expect PV/CV to sustain demand recovery. Moreover, the upcoming festival season, combined with a good kharif sowing season, may aid Tractor demand. 2W volumes would recover at a slower pace v/s last year due to slow demand.

# Private Banks: Large banks gearing up for recovery

- Private banks are trading at P/B of 2.9x, an 18.5% premium to the historical average of 2.5x.
- Most private banks reported subdued business trends, significantly hampered by the COVID disruption. Therefore, disbursements declined sequentially across most retail segments, while certain banks reported some corporate loan growth recovery. We expect 2HFY22 to be better aided by recovery and supported by improving demand over the festive season. Overall, large private banks are well-placed to see elevated market share gains given their strong capital positions, robust balance sheets, and higher provisioning coverage on stressed assets.
- Most private banks reported higher slippage, primarily in the Retail & MSME segment. However, the recovery momentum is healthy, with collection efficiency thus improving in July'21/Aug'21. This would lead to moderation in the slippage run-rate, largely from 2HFY22. Overall, provision coverage remains healthy.
- Large private banks carry additional COVID-19 provision buffers, which should limit the impact on credit cost. Thus, we continue to prefer ICICIB, AXSB, & HDFCB.

RBL Bank	12.0	33.7	-65	-43	78	0.7	2.1	-66	-77	-17

# PSU Banks: Earnings visibility improving after multi-year pause; asset quality stabilizing

- PSU banks are trading at P/B of 1.0x, near the historical average of 0.9x.
- The earnings outlook is improving, led by a reduction in credit cost estimates, as most of the PSBs have strengthened their provision coverage in the last couple of years. Most PSBs are carrying PCR in the range of 62-69%, while BOI has the highest provision coverage of ~78%.
- Furthermore, many PSBs have also undergone a capital raise to prepare themselves for growth opportunities; the current capital positions of most PSBs have improved.
- Overall, we believe earnings for PSU banks are poised for a strong rebound. Along with improving asset quality trends, this would enable a healthy 9-21% CAGR in ABVs over FY21-23E v/s muted growth or even declines seen in many of them in prior years. We estimate PSU banks to deliver early double-digit RoE by FY23, while valuations remain undemanding at 0.4-0.6x ABV (barring for SBIN). Thus, we have recently upgraded our rating on BOB to BUY and resumed coverage on INBK and UNBK with a Buy rating. SBI remains our top pick in the sector.

Company	PE (x)			Relative to Nifty P/E (%)		PB (x)			Relative to Nifty P/B (%)

# NBFCs: Collections/Disbursements show MoM improvement in August

- NBFCs are trading at P/B of 3.5x, above the historical average of 2.6x (a 32% premium).
- Some of the larger HFCs are optimistic about reducing credit costs in the coming years, driven by provision reversals/write-backs on customer accounts where they have conservatively made provisions.
- Gold loan demand continues to be resilient in southern India. Gold financiers remain positive, with the loan growth guidance in the higher teens.
- Disbursements have picked up across product segments during the month. Sharp recovery is expected in vehicle finance from Sep'21.
- Lenders continue to maintain excess liquidity in anticipation of an uptick in business activity in the ensuing quarters.
- For AMCs, equity inflows have been strong in the past few months and are likely to sustain. With strong market returns, AUM growth is expected to remain strong.
- 100% margin norms would be applicable from 1<sup>st</sup> Sep, cash volumes for brokerages may be impacted, and higher trade would be offset partly by the surge in the no of active traders.

# Capital Goods: Execution scaling up to pre-COVID levels; order inflows a key monitorable

- The Capital Goods sector trades at a one-year forward P/E multiple of 29.7x, at a 7% premium to its 10-year average P/E of 27.7x.
- Even on a P/B basis, the sector trades at 3.2x – at a 17% premium to its 10-year average multiple of 2.7x.
- The valuation premium relative to the Nifty on a P/B basis has widened. It now trades at a ~4% discount (v/s its 10-year average premium of ~5%). On a P/E basis, the premium stands at ~36%, lower than its 10-year average (~45%).
- Company valuations have now run up owing to: a) improved execution at project sites, b) strong capex spending by the central government, c) strengthening government financials, d) the expectation of strong ordering activity for the remaining fiscal, and e) high liquidity in the system.
- Furthermore, the run-up in commodity prices and anticipated third COVID wave could pose a risk to the execution and margins of EPC companies.

Thermax	38.8	36.9	5	84	95	4.2	3.8	12	32	46

# Cement: Higher costs to impact margins

- The sector trades at one-year forward EV/EBITDA of 17.7x, against the historical average of 14.9x (19% premium).
- Our channel checks indicate that with the onset of the monsoons, cement demand remained soft in Aug'21. Softening demand led to decline in pricing across regions.
- We expect demand and pricing to further soften (MoM) in September due to softening demand. However, with the monsoon retreating around September-end, we expect demand and pricing to improve from Oct'21.
- Rising cost inflation - due to higher petcoke, coal, and diesel prices - would start impacting margins from 2QFY22.

# Consumer: Essentials demand remains strong; Discretionary recovery continues

- The Consumer sector P/E of 47.2x in Aug'21 is at a premium of ~27% to its 10-year average of 37x. On a P/B basis, it trades at 11.2x, at a premium of ~13% to its 10-year average of 9.9x.
- As the country moves beyond the second wave, the focus has been on the unlocking of the economy. This has resulted in fast recovery in consumer mobility and sentiment.
- This has set the path to recovery in Discretionary and Out-of-Home categories. Staples continues to do well. Companies with a higher skew towards Discretionary stand to benefit.
- With a good monsoon (until Jul'21) and continued government spends, rural demand has remained intact. However, as the monsoon was disappointing in Aug, rainfall in Sep would be key for rural demand over the next few months. Urban and metro cities are seeing strong recovery.
- The RM inflation seen in key commodities in the first half of CY21 is now stabilizing. Companies have taken the necessary price hikes to mitigate this impact. However, higher ad spends and other costs, unlike last year, would lead to some pressure on EBITDA margins.
- While the threat of the third COVID wave looms, the medium term outlook remains robust. Trends in COVID cases and ongoing vaccination remain the key monitorables.

# Consumer Durables: Upcoming festive season key for demand offtake

- The Consumer Durables sector trades at a one-year forward P/E multiple of 53.3x, a 68% premium to its 10-year average P/E of 31.8x.
- On a P/B basis, the sector trades at 9.4x – a 66% premium to its 10-year average multiple.
- The valuation premium relative to the Nifty on a P/E basis has widened. It now trades at a ~145% premium (v/s its 10-year average premium of 64%). On a P/B basis, the premium stands at 186%, higher than the 10-year average (~116%).
- Company valuations have run up since FY18, primarily due to: a) strong demand for electrical and white goods, led by rising income levels, b) market share gains for large electrical brands at the expense of the unorganized sector, c) market consolidation in the White Goods segment, and d) the follow up of strong pent-up demand post any disruption (demonetization, GST, COVID-19).
- With the gradual unlock, demand for the Consumer Electricals category is expected to be buoyant despite the commodity inflation, while margins for the Consumer Durables category are expected to remain under pressure.

# Healthcare: Recovery in DF partly offset by subdued US outlook

- After stabilizing near the 10-year average, the Healthcare sector P/E is now at a ~6% premium to the 10-year average. It remains at a marginal discount relative to the Nifty. From the Coverage Universe, almost half are trading at a premium to the respective 10-year average.
- IPM growth was largely driven by Anti-Infectives and Analgesics, with recovery in Respiratory. With the number COVID cases on the decline in Aug'21, IPM is expected to grow 10-12% YoY in FY22, ex-COVID.
- Pricing pressure has increased in the US to the high single digits, which has impacted US sales. The slow pace of new approvals for Indian companies has exacerbated the issue, to some extent.
- The USFDA has begun conducting physical inspections for certain mission-critical facilities. This increases the regulatory risk for some companies, but also provides companies such as IPCA/TRP the opportunity to get the regulatory issues at their facilities resolved.
- Companies with differentiated business models continue to outperform the sector, including SUNP/DIVI/GLAND, with differentiation in Formulations/API/CDMO/Injectables and superior executors (such as LAURUS).
- Vaccine distribution and/or manufacturing opportunities provide an upside to GLAND/DRRD/ARBP/CDH.

# Infrastructure: NHAI ordering activity to resume gradually

- The Infrastructure sector is trading at P/B of 1.4x, near its long-term historical average P/B of 1.3x.
- After muted ordering activity was seen over FY19–20, the business momentum weakened further due to the COVID-19 outbreak. However, ordering by NHAI has picked up pace post the lifting of lockdown restrictions, with ~4,600kms of orders awarded in FY21 (~40% YoY increase). The ordering momentum was moderately disrupted by the second COVID wave in 1QFY22.
- With the center envisaging massive infra development plans, with an expected investment of INR100t by CY24, the next couple of years could lead to higher construction activity.
- We expect strong business opportunities for all players in the sector, which should boost their balance sheets. This should gradually lead to an improvement in their operational performances.
- A gradual ramp-up is expected in toll revenues as the lockdowns across the different states are lifted.

Company	PE (x)			Relative to Nifty P/E (%)		PB (x)			Relative to Nifty P/B (%)

# Media: Subscription revenues remain uncertain due to NTO 2.0

- The Media sector P/E of 15.3x is at a discount of 37% to its 10-year historical average of 24.4x.
- While the NTO 2.0 matter remains sub-judice in the SC, the impact on subscription revenues would remain uncertain until the judgment is passed.
- The movie release line-up is expected to commence from September-end as COVID restrictions reduce gradually. Recovery is expected to speed up during the festive season from October 2021, with big-budget movies scheduled for release.

Zee Entertainment	13.4	30.2	-56	-36	60	1.5	5.2	-72	-54	102

# Metals: Improving demand supports pricing

- The Metals sector is trading at an EV/EBITDA of 4.7x, below its 10-year historical average of 6.7x.
- Improving demand across the globe has helped base metal prices sustain prices at higher levels. Aluminum rose 5% MoM to decadal highs of USD2,674/t.
- We expect domestic steel demand to improve in Sep'21 as local restrictions ease. Furthermore, higher exports should normalize inventory levels. Coupled with improving demand, this would support pricing. Domestic steel prices improved by INR2,000/t MoM to INR66,000/t for HRC and INR52,000/t for rebar.
- NMDC iron ore prices declined 5% MoM in August. Falling iron ore prices in the Odisha and Seaborne markets could lead to some correction in iron ore prices. However, the sharp rise in coking coal prices (~100% in four months) to USD250/t+, if sustained, could weigh on the margins of India steel players in the coming quarters.
- Production cuts in China should keep the demand-supply balance tight, thereby supporting metal prices.

# Oil & Gas: Margins continue to advance – as Brent prices take an about-turn

- The sector trades at a P/B of 1.6x and P/E of 15.0x (11%/27% premium to historical average of 1.4x/11.8x).
- **Brent prices in Aug'21 cooled off from the post-COVID peak**, averaging at USD70.6/bbl (-USD4.5 MoM), as OPEC+ increased oil production by 0.4mnobpd from Aug'21 (reducing production cuts by 5.8mnobpd). Furthermore, a rise in COVID cases due to the Delta variant impacted demand, weighed by a fresh set of lockdowns.
- **SG GRM averaged higher MoM at USD3.2/bbl in Aug** (+USD0.3 MoM) – primarily due to an improvement in FO margins, while Gasoline/Gasoil margins decreased (by -USD0.7 MoM) to USD9.6/bbl / USD4.0/bbl.
- **Average gross marketing margins improved in Aug to INR3.0/lit / INR6.2/lit for Petrol/Diesel (+INR1.3/1.0 MoM)** – as retail fuel prices have remained unchanged since mid-July.
- **Petchem margins improved**, with PE/PP/PVC margins up 12%/6%/9% MoM – largely due to a fall in Naphtha prices.
- **Spot LNG prices climbed to a six-month high** of ~USD17.6/mmbtu in Aug (+USD3 MoM) on the back of tighter demand-supply fundamentals.

# Sp. Chemicals: Brent prices cool off, while freight rates heat up

- The sector trades at P/B of 8.1x and P/E of 38.8x.
- Brent prices in Aug'21 cooled off from the post COVID peak - averaging at USD70.6/bbl (-USD4.5 MoM, i.e., -6% MoM), as OPEC+ increased its oil production by 0.4mnobpd from Aug'21 (reducing production cuts by 5.8mnobpd). Furthermore, the rise in COVID cases due to the Delta variant impacted demand, weighed by a fresh set of lockdowns.
- On similar lines, the prices of organic compounds such as Benzene and Styrene decreased 6-7% MoM, while Butadiene prices were up 12% MoM.
- Apart from the aforementioned key RMs for specialty chemical companies - prices of Propylene, Toluene, and Methanol remained flat MoM in Aug.
- The Hurricane IDA (the 2<sup>nd</sup> most intense hurricane to strike the state of Louisiana in the US) resulted in various plant shutdowns and port closures – which should support product prices in the near term.
- Furthermore, port closures (especially in China) and blank sailing by ships are the current concerns apart from higher freight costs, which are impacting the ability of Indian companies to serve export demand.

# Retail: Faster recovery expected

- The Retail sector trades at P/E of 125.4x, at a 68% premium to its 10-year historical average of 74.7x.
- Faster recovery is expected v/s last year as the lockdown is gradually lifted across the country and major cities open up.
- Store additions are expected to re-commence as the lockdowns are lifted and companies start seeing stability in operations. All retailers have highlighted that they would re-commence their strong addition plans and add ~15-20% new stores in FY22, thus maintaining their store addition guidance.

# Technology: Strong demand, tight supply

- The Technology sector is trading at P/E of 30.0x, a 71% premium to its historical average of 17.5x.
- 1QFY22 witnessed strong sequential growth across companies, with the midcaps outgrowing the largecaps.
- The overall outlook on enterprise technology spending is strong, and that for Indian IT growth is robust.
- The industry is seeing supply-side challenges, which are visible in the higher attrition and wage inflation. However, we expect these challenges to be transient as strong fresher hires and re-skilling efforts should be able to normalize the supply side. Moreover, margin cushions include continued traction in offshoring, better pricing, and operating leverage from the strong demand momentum.
- We believe largecap companies are better placed to absorb the supply pressure given their capabilities in training employees for newer skills.
- Among the Tier I players, we like INFO and HCLT on the expectation of industry-leading growth. From the Tier II pack, we prefer LTTS/CYL/ZENT given the attractive and industry-relevant portfolio.

# Telecom: Gradual recovery in subscriber base

- The Telecom sector is trading at EV/EBITDA of 7.5x, at a 7% discount to its 10-year historical average of 8.1x.
- VIL has moved the Supreme Court with a review petition on the back of the SC rejecting its earlier appeal to allow the correction of "errors" in AGR calculations.
- TRAI's monthly data on subscribers for Jun'21 indicates the industry subscriber base saw recovery from the impact 2<sup>nd</sup> wave of COVID-19 as the country witnessed gradual unlocking. Subsequently, gross subscribers expanded by 4m, while the active subscriber base declined by 1.3m, reaching 1,181m/985m - as the industry see the consolidation of dual SIM cards.

MOFSL is a subsidiary company of Passionate Investment Management Pvt. Ltd.. (PIMPL). MOFSL is a listed public company, the details in respect of which are available on [www.motilaloswal.com](http://www.motilaloswal.com). MOFSL (erstwhile Motilal Oswal Securities Limited - MOSL) is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange of India Ltd. (NSE) and Bombay Stock Exchange Limited (BSE), Multi Commodity Exchange of India Limited (MCX) and National Commodity & Derivatives Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL), NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (AMFI) for distribution of financial products and Insurance Regulatory & Development Authority of India (IRDA) as Corporate Agent for insurance products. Details of associate entities of Motilal Oswal Financial Services Limited are available on the website at <http://onlinereports.motilaloswal.com/Dormant/documents/Associate%20Details.pdf>

Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at <https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx>

MOFSL, its associates, Research Analyst or their relative may have any financial interest in the subject company. MOFSL and/or its associates and/or Research Analyst may have actual/beneficial ownership of 1% or more securities in the past 12 months. MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report. Research Analyst may have served as director/officer, etc. in the subject company in the past 12 months. MOFSL and/or its associates may have received any compensation from the subject company in the past 12 months.

In the past 12 months, MOFSL or any of its associates may have:

- a) managed or co-managed public offering of securities from subject company of this research report,
- b) received compensation for investment banking or merchant banking or brokerage services from subject company of this research report,
- c) received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report.
- d) Subject Company may have been a client of MOFSL or its associates in the past 12 months.

MOFSL and its associates have not received any compensation or other benefits from the subject company or third party in connection with the research report. To enhance transparency, MOFSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report. Compensation of Research Analysts is not based on any specific merchant banking, investment banking or brokerage service transactions. Above disclosures include beneficial holdings lying in demat account of MOFSL which are opened for proprietary investments only. While calculating beneficial holdings, It does not consider demat accounts which are opened in name of MOFSL for other purposes (i.e holding client securities, collaterals, error trades etc.). MOFSL also earns DP income from clients which are not considered in above disclosures.

**Terms & Conditions:**

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

**Analyst Certification**

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

**Disclosure of Interest Statement****Companies where there is interest**

- Analyst ownership of the stock

No

A graph of daily closing prices of securities is available at [www.nseindia.com](http://www.nseindia.com), [www.bseindia.com](http://www.bseindia.com). Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

**Regional Disclosures (outside India)**

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

**For Hong Kong:**

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Financial Services Limited (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

**For U.S.:**

Motilal Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts"), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

## For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets Singapore Pte Ltd ("MOCMSPL") (Co.Reg. NO. 201129401Z) which is a holder of a capital markets services license and an exempt financial adviser in Singapore,

as per the approved agreement under Paragraph 9 of Third Schedule of Securities and Futures Act (CAP 289) and Paragraph 11 of First Schedule of Financial Advisors Act (CAP 110) provided to MOCMSPL by Monetary Authority of Singapore. Persons in Singapore should contact MOCMSPL in respect of any matter arising from, or in connection with this report/publication/communication. This report is distributed solely to persons who qualify as "Institutional Investors", of which some of whom may consist of "accredited" institutional investors as defined in section 4A(1) of the Securities and Futures Act, Chapter 289 of Singapore ("the SFA"). Accordingly, if a Singapore person is not or ceases to be such an institutional investor, such Singapore Person must immediately discontinue any use of this Report and inform MOCMSPL.

**Disclaimer:** The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, not its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
